

THE EXTRAS INCLUDED AT VEGAS VOLLEY:

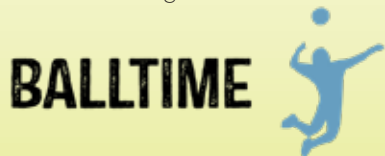

An award-winning applied research and training program focused on developing, evaluating, and training performance optimization for athletes. Developed by UNLV Distinguished Professor Dr. Brad Donohue.

- 8 sessions of in-person training
- Trains sports performance mentality and supports overall mental health & wellbeing of our athletes

SportsRecruits

Platform to build out your recruiting profile, post highlight videos, communicate with coaches, and more!

- Search for volleyball schools based on programs of study, keeping academics in focus during the recruiting process
- Access coaches through one centralized platform, saving you from having to track down contact info

Balltime uses AI to analyze your volleyball footage, automatically break down plays, and remove downtime.

- Allows coach/player engagement for skill feedback
- Players can create recruiting highlight reels and vertical formatted social media reels 10x faster than with regular tools
- Athletes can easily filter and search for their own clips and actions (E.g. serving, attacking, etc.)

ABOUT:

Vegas Volley is a different kind of club. It's competitive. It's about winning. But this organization is about so much more! Vegas Volley is a player-centric organization that focuses on the true growth and development of athletes, including the social aspects of the game. It's true that games are played to win (that's why we keep score), but it's also true that games like volleyball are meant to be fun!

PHILOSOPHY:

Vegas Volley coaches utilize psychology-backed teaching methods that employ technique-focused, error correction methods reinforced with positive support to help athletes progress.

Focusing athletes' minds positively on their successful actions on the court will significantly accelerate their development rate, so rather than punishing errors, we reward success. With motor skills being heavily controlled by the subconscious mind, we strive to keep our athletes' minds focused on what they do right to help them see results quickly!
