

TESTIMONIALS:

"Vegas Volley is an incredible club with amazing coaches, who truly care about the athletes mental and physical health. I love how they utilize goal setting and mental strength to help players improve."
- Syd C. || '21-22 18U, '22-'23 18U

"This was the best club experience I've had thus far! We loved the coaching staff and girls became so skilled by the end of the season. The director was very upfront and honest about the dues and what to expect with this club. Very well rounded all in all!"
- Georgia || PARENT || '22-'23

"I love the environment of the club, it became like a family without any of us even trying. Everyone got along and had fun. I also loved the coaching itself with volleyball feeling the most stress-free it's ever been, no yelling and punishments after mistakes, it made me realize that mistakes are going to happen but fixing them is more important."
- Emma O. || '22-'23 16U, '23-'24 17U

"Our daughter has improved her skills & confidence, while also having fun at tournaments and team bonding events. We are truly impressed with this competitive, professional and dedicated club to grow our daughter and each teammate!"
- Natalie G. || PARENT || '22-'23, '23-'24

ABOUT:

Vegas Volley is a different kind of club. It's competitive. It's about winning. But this organization is about so much more! Vegas Volley is a player-centric organization that focuses on the true growth and development of athletes, including the social aspects of the game. It's true that games are played to win (that's why we keep score), but it's also true that games like volleyball are meant to be fun!

PHILOSOPHY:

Vegas Volley coaches utilize psychology-backed teaching methods that employ technique-focused, error correction methods reinforced with positive support to help athletes progress.

Focusing athletes' minds positively on their successful actions on the court will significantly accelerate their development rate, so rather than punishing errors, we reward success. With motor skills being heavily controlled by the subconscious mind, we strive to keep our athletes' minds focused on what they do right to help them see results quickly!
